My Projects Experience

1- https://hotel-camp.vercel.app/

This project focuses on hotel services and reviews, providing users with detailed information and images. Users can interact with the system in various forms, such as chat or communication via Gmail.

2-https://creative-architecture-eg.netlify.app/

This is my first freelance project for a company named Creative. The project involves reviewing information about offers, apartments, interior designs, and facilitating communication.
